## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 4/17/06 has been entered.

### ***Allowable Subject Matter***

2. Claims 11-22&25-27 are allowable over the prior art of record.

3. The following is a statement of reasons for the indication of allowable subject matter:

Regarding claim 11, the invention relates to a program receiver and a method of display processing of a program explanation screen, including a receiver/decoder in a digital satellite broadcasting system.

The closest references Ohara et al (US 6,292,618) disclose an image recording and reproducing apparatus capable of recording and reproducing both of digital and analog signals, including a reference signal necessary to display a state of the image recording and reproducing apparatus in a picture and an operation method of the image

recording and reproducing apparatus, Young et al (US 6,832,385) teach a system and process that displays on a television screen, overlaying a primary television display or program, a small background schedule guide that can be easily accessed by a user during lulls in the primary television display or program, and Saib et al (US 6,292,624) teach a system and method for selectively recording a show without using a timer set-up screen.

However, Ohara et al, Young et al and Saib et al fail to explicitly disclose a television signal receiver, where the receiver further comprises wherein the reproduced program explanation screen and the reproduced contents display screen each include at least one additional indicia element indicating that the program being viewed is being reproduced from the external storage device as opposed to a program currently being received from the broadcast television programming.

Regarding claim 16, the invention relates to a program receiver and a method of display processing of a program explanation screen, including a receiver/decoder in a digital satellite broadcasting system.
